The Enhancement and Standardization of Climate-Related Disclosures for Investors

AGENCY: Securities and Exchange Commission

ACTION: Final rules.

SUMMARY: The Securities and Exchange Commission ("Commission") is adopting amendments to its rules under the Securities Act of 1933 ("Securities Act") and Securities Exchange Act of 1934 ("Exchange Act") that will require registrants to provide certain climate-related information in their registration statements and annual reports. The final rules will require information about a registrant's climate-related risks that have materially impacted, or are reasonably likely to have a material impact on, its business strategy, results of operations, or financial condition. In addition, under the final rules, certain disclosures related to severe weather events and other natural conditions will be required in a registrant's audited financial statements.

DATES: *Effective date*: These final rules are effective on [INSERT DATE 60 DAYS AFTER DATE OF PUBLICATION IN THE *FEDERAL REGISTER*].

Compliance date: See section II.O. for further information on transitioning to the final rules.

I. INTRODUCTION

Climate-related risks, their impacts, and a public company's response to those risks can significantly affect the company's financial performance and position.[3] Accordingly, many investors and those acting on their behalf—including investment advisers and investment management companies—currently seek information to assess how climate-related risks affect a registrant's business and financial condition and thus the price of the registrant's securities. Investors also seek climate-related information to assess a registrant's management and board oversight of climate-related risks so as to inform their investment and voting decisions. In light of these investor needs, the Commission is adopting rules to require registrants to provide certain
